

**Name:** Clayton Shuman, PhD, MSN, RN

**Current Title:** Assistant Professor

**Affiliation:** University of Michigan

**Candidate for:** MNRS Board Director-At-Large

**Personal Statement:**

I am honored and thrilled to be considered for serving on the Board of Directors. I am an Assistant Professor at the University of Michigan School of Nursing with a program of research focused on improving maternal-infant health through implementation science. Like many members, I started my membership as a student and have since progressed into leadership roles. Over the last five years, I have contributed to and benefitted from MNRS and its membership in many ways. I was awarded the SAGE/WJNR Best Graduate Student Paper in 2017 and the Health Systems, Policy, and Informatics RIG Dissertation Award in 2018. I co-led a preconference in implementation science at the 2018 annual meeting. Over the years, I have led numerous competitive symposia and served as a reviewer for competitive abstracts. In 2018, I was elected co-chair of the Health Systems, Policy, and Informatics RIG. I am currently out-going co-chair of the HSPI RIG and would like to continue my service to MNRS as a Board Member-at-Large. I am committed to MNRS and its vision to advance science, transform practice, and enhance careers. If elected, I look forward to contributing my unique skills in implementation science, innovation, and collaboration to address the strategic plan and goals of MNRS.
